

❑ **One Way:**

- **Flying From Airport/City:**

- Departure City/Airport is a required field, ensuring users specify their starting point accurately for the flight.
- It only accepts Alpha characters, preventing users from entering numerical or special characters which might cause errors in processing.
- Partial searching is available (Minimum for two letters), allowing users to conveniently find their departure city even if they don't input the full name.
- For an invalid city/Airport, it shows 'Undefined', providing immediate feedback to users if their input does not match any recognized cities.
- Inside cities of Bangladesh like Dhaka, Chattagram, Sylhet, Cox's Bazar, Rajshahi, Barishal, Jashore, Ishurdi, and Saidpur are accepted, ensuring that the system recognizes major cities within the country.

- **Flying To Airport/City:**

- Destination City/Airport is a required field, ensuring users specify their intended destination accurately for the flight.
- Similar to the departure field, it only accepts Alpha characters, ensuring consistency in input validation.
- Partial searching is available (Minimum for two letters), providing a user-friendly experience by allowing users to find their destination city with minimal typing effort.
- Similar to the departure field, for an invalid city/Airport, it shows 'Undefined', guiding users to correct their input if necessary.
- The restriction that Departure City/Airport & Destination City/Airport can't be the same is enforced, preventing users from inadvertently selecting the same location for departure and destination.

- **Journey Date:**

- The previous date can't be selected, ensuring that users can't book flights for dates that have already passed.
- It is a required field, indicating that users must select a journey date before proceeding with the booking process.
- Date format: 10-Mar-2024, providing clarity to users regarding the expected format for inputting the journey date.
- Maximum Purchase time: one year from the current month, limiting the booking window to ensure that users can't book flights too far in advance.

❑ **Round Trip:**

- **Flying From Airport/City:**

- (Repeat of One Way's instructions)

- **Flying To Airport/City:**

- (Repeat of One Way's instructions)

- **Journey Date:**
 - (Repeat of One Way's instructions)
- **Return Date:**
 - It is a required field, ensuring that users specify a return date for round-trip bookings.
 - The date of return can be after the date of the journey, allowing flexibility for users to choose their return date according to their preferences and travel plans.
 - Maximum Purchase time: One year from the current month, ensuring that users can't book return flights too far in advance, similar to the restrictions for the journey date.
- ❑ **Multi City:**
 - **Flying From/To Airport/City 1:**
 - (Repeat of One Way's instructions)
 - **Flying To Airport/City 1:**
 - (Repeat of One Way's instructions)
 - **Journey Date 1:**
 - (Repeat of One Way's instructions)
 - **Flying From/To Airport/City 2:**
 - (Repeat of One Way's instructions)
 - **Flying To Airport/City 2:**
 - (Repeat of One Way's instructions)
 - **Journey Date 2:**
